

Special Math Offering for 9th Grade

Double Period Math Class – Algebra/Geometry

Garfield High School offers a double period Algebra 1A/1B and Geometry 1A/1B class to freshmen who are not currently in the honors track in Middle School, but aspire to reach Calculus by their senior year. The curriculum of this program is specifically designed for students who have successfully completed 8th grade mathematics with an A or B average and who have the desire and focus to accelerate their progress in mathematics. Students who choose to participate in this program will give up one elective class in order to accommodate the double math period in their schedule.

Interested students should fill out the application form below and scan or mail it by **MAY 15** to:
